

# Senior BI Developer

## Job Description

Are you a BI professional with experience in traditional BI data warehousing and reporting applications or perhaps you are already working with cloud based BI technologies and now want to do more?

Are you looking for an opportunity to evolve your skillset in a new cloud-driven technology paradigm?

This could be the role for you!

As an experienced BI professional, you'll be seeking the right opportunity to grow your career. Here at Crimson Macaw we can give you the experience of working in a new fast-growing consultancy specialising in cloud, data platforms and business intelligence.

Your knowledge, experience and drive will help us create a great data consultancy. You will help us deliver powerful BI solutions for customers. You'll work on exciting projects for large clients and we will support you, every step of your career at Crimson Macaw.

Our solutions use Matillion for ELT, Tableau or Looker for reporting, and Snowflake for data warehousing. You also will learn more about the AWS ecosystem as our projects are deployed there. You will be encouraged and supported in becoming certified in each technology where appropriate.

Being part of a consultancy, you will need to visit customer sites and understand how we can help drive their success. We also support our customers' solutions and you will help with this, which will include call outs.

All necessary training will be provided.

## Required

- Experience in using ETL/ELT tools, such as Matillion, ODI, Informatica, SSIS etc.
- Experience/Understanding of databases/SQL.
- Understand dimensional modelling and data warehousing.
- Able to work within a team and when necessary, independently.
- Be highly numerate.
- Good English skills (both written and verbal).
- Full Clean Driving License.

## Desirable Skills

Experience using Amazon Web Services.

Reporting Tools such as Tableau, Looker, OBIEE, Business Objects...etc.

## **The Package**

- Salary of £40-60k (based on qualifications/experience)
- Performance based bonus
- Company pension
- Various benefits including: car allowance, private medical, Safari Books Online and gym membership.
- Certification costs

## **How to apply:**

Please apply by sending a CV and covering letter to [jobs@crimsonmacaw.com](mailto:jobs@crimsonmacaw.com).

Your CV should contain your working experience and skills etc. Your covering letter should express why you are interested in this field and any useful information that you think we will find relevant; this could be applications you have built, presentations at meetups, or anything else that shows your enthusiasm or work.

**WE DO NOT ACCEPT SUBMISSIONS FROM RECRUITMENT AGENCIES AT THIS TIME**

## **About Us**

We are a growing consultancy specialising in the cloud, data and business intelligence working with many large clients you will know already. Partnered with Amazon Web Services (<https://aws.amazon.com>), Snowflake (<https://www.snowflake.net>), Looker (<https://looker.com>), Matillion (<https://www.matillion.com/>), Hashicorp (<https://www.hashicorp.com/>) and Tableau (<https://www.tableau.com>), we help our customers leverage the value of their data through quick to implement, scalable cloud technologies and market leading analysis and visualisation tools. We are based in the city centre of Manchester (M60 0AS) in the NOMA district near Victoria Station and the Northern Quarter.
